

## ABEC 3 &amp; MAX Enduro Bearing

- "2RS" son las obturaciones genericas "2 Rubber Seals" (una en cada lado). Las obturaciones de Enduro Bearing estan marcadas como "LLB" o "LLU" que indican un diseño mas especifico.
- "LLB" es una obturacion de baja friccion de doble labio y un diseño laberintico de la ranura.
- "LLU" es una obturacion de doble labio y mayor estanqueidad, además de un diseño laberintico de la ranura.
- Todos los rodamientos Enduro tienen nivel de precision ABEC 3 con esferas de Grado 20, con jaulas de acero
- La gama de rodameintos "MAX" no tienen jaula de acero y permiten mayor numero de bolas. "MAX" significa Maximun Balls. Generalmente tienen un 35% mas de capacidad de carga que los rodamientos con bolas enjauladas.
- Los rodamientos "MAX" no giran tan suavemente como los de bolas enjauladas y son especificos para las articulaciones de los sistemas de suspension o en uniones donde los rodameintos estandar fallan prematuramente por sobrecarga.
- La Capacidad de Carga Estatica (SC, en kg) es el limite de carga que soporta el rodamiento antes de el fallo por deformacion.
- **Instalar siempre los rodamientos presionando las pistas exteriores sobre elalojamiento. Nunca instalarlos golpeando.**

ZERØ Ceramic Bearing

• Bolas de Si3N4 (Nitruro de Silicio) de Grado 3, pistas ABEC 5 52100, jaula de Nylon reforzado con grafito.

Triple tratamiento criogenico superficial para obtener una superficie con estructura de Magnetita, resistente a la corrosion y con un coeficiente muy bajo de friccion. Obturaciones de Silicona VV

Full Ceramic Sealed Bearing

- Bolas de Si3N4 (Nitruro de Silicio) Grado 3, Pistas ABEC 5 de Si3N4, jaulas de PTFE, obtacion de Silicona 70 en un lado, grasa especifica DuPont Krytox
- Los rodamientos Full Ceramic requieren de herramientas especiales y conocimientos para su instalacion. La instalacion debe ser realizada por un servicio tecnico autorizada, de lo contrario supone la perdida de garantia.

**XD-15**

- La unica caja de pedalier con un año de garantia.
- 100% fabricada en USA con aleaciones aeronauticas.
- Mayor duracion que la mayoría de BB del mercado.
- El unico BB de contacto angular con bolas de 3/16". Soporta la carga axial en el apriete. Bolas de Grado 3 CERBEC Ceramic.
- Bolas sobredimensionadas para aumentar la capacidad de carga y reducir la friccion (3,5 veces mmayor que Shimano, SRAM o Campagnolo).
- Tratamiento superficial de Nitruracion, con menos imperfecciones que cementado con Carbono. Esto reduce la friccion y aumente la duracion del rodamiento.
- 3,5 veces más resistente a la corrosion que el acero inoxidable.
- 10% más ligero que Shimano 7900 y FSA MegaExo Light. Al menos 30% más ligero que SRAM Red.
- Versiiones disponible para carretera y MTB.
